ELSEVIER

Subject Index for Volumes 55–58

Algorithms and Modeling

Application of Standardized Principal Component Analysis to Land-Cover Characterization Using Multitemporal AVHRR Data, Y. Hirosawa, S. E. Marsh, and D. H. Kliman, 58:267

Artificial Neural Network Response to Mixed Pixels in Coarse-Resolution Satellite Data, A. Moody, S. Gopal, and A. H. Strahler, 58:329

Assessment of Biophysical Vegetation Properties through Spectral Decomposition Techniques, S. J. Hurcom, A. R. Harrison, and M. Taberner, 56:203

An Assessment of Several Linear Change Detection Techniques for Mapping Forest Mortality Using Multitemporal Landsat TM Data, J. B. Collins and C. E. Woodcock, 56:66

Classification of Remote Sensing Images Having High Spectral Resolution, J. P. Hoffbeck and D. A. Landgrebe, 57:119

Critique of Stepwise Multiple Linear Regression for the Extraction of Leaf Biochemistry Information from Leaf Reflectance Data, Y. L. Grossman, S. L. Ustin, S. Jacquemoud, E. W. Sanderson, G. Schmuck, and J. Verdebout, 56:182

Estimating Net Ecosystem Exchange of Carbon Using the Normalized Vegetation Index and an Ecosystem Model, F. Veroustraete, J. Patyn, and R. B. Myneni, 58:115

Inversion of a Vegetation Reflectance Model with NOAA AVHRR Data, J. L. Privette, W. J. Emery, and S. S. Schimel, 58:187

Leaf Optical Properties with Explicit Description of Its Biochemical Composition: Direct and Inverse Problems, T. Fourty, F. Baret, S. Jacquemoud, G. Schmuck, and J. Verdebout, 56:104

A Method for Manual Endmember Selection and Spectral Unmixing, A. Bateson and B. Curtiss, 55:219

Modeling Radiative Transfer in Heterogeneous 3-D Vegetation Canopies, J. P. Gastellu-Etchegarry, V. Demarez, V. Pinel, and F. Zagolski, 58:131

A Modified Hapke Model for Soil Bidirectional Reflectance, S. Liang and R. G. Townshend, 55:1

Multivariate Statistical Classification of Soil Spectra, A. Palacios-Orueta and S. L. Ustin, 57:108

Optimization of Soil-Adjusted Vegetation Indices, G. Rondeaux, M. Steven, and F. Baret, 55:95

Potential and Limitations of Information Extraction on the Terrestrial Biosphere from Satellite Remote Sensing, M. M. Verstraete, B. Pinty, and R. B. Myneni, 58:201

Selection and Characterization of Saharan and Arabian Desert Sites for the Calibration of Optical Satellite Sensors, H. Cosnefroy, M. Leroy, and X. Briottet, 58:101

A Simple Anisotropic Reflectance Model for Homogeneous Multilayer Canopies, J. P. Gastellu-Etchegarry, F. Zagolski, and J. Romier, 57:22

Altimetry

Applicability of Airborne Profiling Radar to Forest Inventory, J. Hyyppä and M. Hallikainen, 57:39

Estimation of Tree Heights and Stand Volume Using an Airborne Lidar System, M. Nilsson, 56:1

Ancillary Data

Use of Auxiliary Data to Improve the Precision of Estimators of Thematic Map Accuracy. S. Stehman, 58:169

Area Estimation

Calibration-Based Models for Correction of Area Estimates Derived from Coarse Resolution Land-Cover Data, A. Moody and C. E. Woodcock, 58:225

Atmosphere Properties

Aerosol Size Distribution and Refractive Index from Bistatic Lidar Angular Scattering Measurements in the Surface Layer, G. Pandithurai, P. C. S. Devara, P. E. Raj, and S. Sharma, 56:87

Atmospheric Effects

Strategy for Direct and Indirect Methods for Correcting the Aerosol Effect on Remote Sensing: From AVHRR to EOS-MODIS, Y. J. Kaufman and D. Tanré, 55:65

AVHRR

Application of Standardized Principal Component Analysis to Land-Cover Characterization Using Multitemporal AVHRR Data, Y. Hirosawa, S. E. Marsh, and D. H. Kliman, 58:267

Calibrating Long-Term AVHRR-Derived NDVI Imagery, M. Roderick, R. Smith, and G. Lodwick, 58:1

Calibration of the AVHRR Shortwave Channels: II. Application to NOAA 11 during Early 1991, R. M. Mitchell, D. M. O'Brien, B. W. Forgan, 55:139

Identification of Contaminated Pixels in AVHRR Composite Images for Studies of Land Biosphere, J. Cihlar, 56:149

Improved Cloud Detection for Daytime AVHRR Scenes over Land, J. J. Simpson and J. I. Gobat, 55:21

Inversion of a Vegetation Reflectance Model with NOAA AVHRR Data, J. L. Privette, W. J. Emery, and S. S. Schimel, 58:187

Land Cover Classification with AVHRR Multichannel Composites in Northern Environments, J. Cihlar, H. Ly, and Q. Xiao, 58:36

Mapping Land Surface Emissivity from NDVI:Application to European, African, and South American Areas, E. Valor and V. Caselles, 57:167

Mesoscale Circulation Features of the Great Barrier Reef Region Inferred from NOAA Satellite Imagery, D. M. Burrage, C. R. Steinberg, W. J. Skirving., and J. A. Kleypas, 56:21

The Precision of the NDVI Derived from AVHRR Observations, M. Roderick, R. Smith, and S. Cridland, 56:57

Preflight Calibration Anomaly in the NOAA 14 AVHRR Channels 1 and 2, R. M. Mitchell, 56:141

Satellite Assessment of Mississippi River Plume Variability: Causes and Predictability, N. D. Walker, 58:21

Strategy for Direct and Indirect Methods for Correcting the Aerosol Effect on Remote Sensing: From AVHRR to EOS-MODIS, Y. J. Kaufman and D. Tanré, 55:65

Biogeochemistry

Change Detection

An Assessment of Several Linear Change Detection Techniques for Mapping Forest Mortality Using Multitemporal Landsat TM Data, J. B. Collins and C. E. Woodcock, 56:66

Climate

Clouds

Cloud Detection from a Sequence of SST Images, J.-F. Cayula and P. Cornillon, 55:80

Identification of Contaminated Pixels in AVHRR Composite Images for Studies of Land Biosphere, J. Cihlar, 56:149

Improved Cloud Detection for Daytime AVHRR Scenes over Land, J. J. Simpson and J. I. Gobat, 55:21

Crops

Analyses of Spectral-Biophysical Relationships for a Corn Canopy, M. Amparo Gilabert, S. Gandía, J. Melía., 55:11

Combined Use of Optical and Microwave Remote Sensing Data for Crop Growth Monitoring, J. G. P. W. Clevers and H. J. C. van Leeuwen, 56:42

Growth, Radiation Use Efficiency, and Canopy Reflectance of Wheat and Corn Grown under Elevated Ozone and Carbon Dioxide Atmospheres, B. F. T. Rudorff, C. L. Mulchi, S. T. Daughtry, E. H. Lee, 55:163

Remote Sensing of Foliar Chemistry of Inundated Rice with Imaging Spectrometry, V. C. LaCapra, J. M. Melack, M. Gastil, and D. Valeriano, 55:50

Spectral Properties of Iron-Deficient Corn and Sunflower Leaves, M. Mariotti, L. Ercoli, and Masoni, A., 58:282

The Status of Agricultural Lands in Egypt: the Use of Multitemporal NDVI Features Derived from Landsat TM, M. Pax Lenney, C. E. Woodcock, J. B. Collins., and H. Hamdi, 56:8

Desert

The Effect of Microphytes on the Spectral Reflectance of Vegetation in Semiarid Regions, A. Karnieli, M. Shachak, H. Tsoar, E. Zaady, Y. Kaufman, A. Danin, and W. Porter, 57:88

Nonlinear Spectral Mixing in Desert Vegetation, T. W. Ray and B. C. Murray, 55:59

Radar Backscatter Characteristics of a Desert Surface, J. Ridley, F. Strawbridge, R. Card, and H. Phillips, 57:63

Selection and Characterization of Saharan and Arabian Desert Sites for the Calibration of Optical Satellite Sensors, H. Cosnefroy, M. Leroy, and X. Briottet, 58:101

Earth Observing System

Strategy for Direct and Indirect Methods for Correcting the Aerosol Effect on Remote Sensing: From AVHRR to EOS-MODIS, Y. J. Kaufman and D. Tanré, 55:65

Use of a Green Channel in Remote Sensing of Global Vegetation from EOS-MODIS, A. A. Gitelson, Y. J. Kaufman, and M. N. Merzlyak, 58:289

Ecology

Estimating Net Ecosystem Exchange of Carbon Using the Normalized Vegetation Index and an Ecosystem Model, F. Veroustraete, J. Patyn, and R. B. Myneni, 58:115

Identifying Terrestrial Carbon Sinks: Classification of Successional Stages in Regenerating Tropical Forest from Landsat TM Data, G. M. Foody, G. Palubinskas, R. M. Lucas, P. J. Curran., and M. Honzak, 55:205

A New Approach for Remote Sensing of Canopy-Absorbed Photosynthetically Active Radiation. I: Total Surface Absorption, Z. Li and L. Moreau, 55:175

A New Approach for Remote Sensing of Canopy-Absorbed Photosynthetically Active Radiation. II: Proportion of Canopy Absorption, L. Moreau and Z. Li, 55:192

Potential and Limitations of Information Extraction on the Terrestrial Biosphere from Satellite Remote Sensing, M. M. Verstraete, B. Pinty, and R. B. Myneni, 58: 201

Retrieving Leaf Area of Boreal Conifer Forests Using Landsat TM Images, J. M. Chen and J. Cihlar, 55:153

Emissivity

Mapping Land Surface Emissivity from NDVI:Application to European, African, and South American Areas, E. Valor and V. Caselles, 57:167

Energy Balance

Evapotranspiration

Fires

Fluorescence

An Analysis of Chlorophyll Fluorescence Algorithms for the Moderate Resolution Imaging Spectrometer (MODIS), R. M. Letelier and M. R. Abbott, 58:215

Characterization of the Photosynthetic System by Measuring the Laser-Induced Chlorophyll Fluorescence in the msec Range from Medium Distances, B. Ruth, 56: 79

Detection of Solar-Excited Chlorophyll α Fluorescence and Leaf Photosynthetic Capacity Using a Fraunhofer Line Radiometer, G. A. Carter, J. H. Jones, R. J. Mitchell, and C. H. Brewer, 55:89

Estimation of the Chlorophyll Fluorescence Lifetime of Plant Canopies: Validation of a Deconvolution Method Based on the Use of a 3-D Canopy Mockup, L. Camenen, Y. Goulas, G. Guyot, Z. G. Cerovic, G. Schmuck., and I. Moya, 58:157

Fluorosensing of Water Stress in Plants: Diurnal Changes of the Mean Lifetime and Yield of Chlorophyll Fluorescence, Measured Simultaneously and at Distance With a τ-LIDAR and a Modified PAM-Fluorimeter, in Maize, Sugar Beet, and Kalanchoe, Z. G. Cerovic., Y. Goulas, M. Gorbunov, J. M. Briantais, L. Camenen, and I. Moya, 58:311

Forests

Applicability of Airborne Profiling Radar to Forest Inventory, J. Hyyppä and M. Hallikainen, 57:39

An Assessment of Several Linear Change Detection Techniques for Mapping Forest Mortality Using Multitemporal Landsat TM Data, J. B. Collins and C. E. Woodcock, 56:66

Estimation of Tree Heights and Stand Volume Using an Airborne Lidar System, M. Nilsson, 56:1

Extracting Forest Age in a Pacific Northwest Forest from Thematic Mapper and Topographic Data, D. S. Kimes, B. N. Holben, J. E. Nickeson, W. A. McKee, 56:133

High Spectral Resolution Reflectance of Douglas Fir Grown under Different Fertilization Treatments: Experiment Design and Treatment Effects, J. Dungan, L. Johnson, C. Billow, P. Matson, J. Mazzurco, J. Moen, and V. Vanderbilt, 55:217

Identifying Terrestrial Carbon Sinks: Classification of Successional Stages in Regenerating Tropical Forest from Landsat TM Data, G. M. Foody, G. Palubinskas, R. M. Lucas, P. J. Curran., and M. Honzak, 55:205

An Object-Specific Image-Texture Analysis of H-Resolution Forest Imagery, G. J. Hay, K. O. Niemann, and G. F. McLean, 55:108

Potential of Simultaneous Dual-Frequency Radar Altimeter Measurements from TOPEX/Poseidon for Rainfall Estimation over Oceans, S. M. Bhandari, and S. K. Varma, 58:13

Retrieving Leaf Area of Boreal Conifer Forests Using Landsat TM Images, J. M. Chen and J. Cihlar, 55:153

Thematic Mapper Characterization of Lodgepole Pine Seral Stages in Yellowstone National Park, USA, M. E. Jakubauskas, 56:118

Geographic Information Systems

Geology

Anomalies on Geologic Maps from Multispectral and Textural Classification: The Bleida Mining District (Morocco), A. Emran, M. Hakdaoui, and J. Chorowicz, 57:13

Global Change

Use of a Green Channel in Remote Sensing of Global Vegetation from EOS-MODIS, A. A. Gitelson, Y. J. Kaufman, and M. N. Merzlyak, 58:289

GOES

Hydrology

Optical Properties of the Water in a Deltaic Environment: Prospective Tool to Analyze Satellite Data in Turbid Waters, Ferrari, G. M., Hoepffner, N., Mingazzini, M., 58:69

Satellite Assessment of Mississippi River Plume Variability: Causes and Predictability, N. D. Walker, 58:21

Ice

Image Processing

Artificial Neural Network Response to Mixed Pixels in Coarse-Resolution Satellite Data, A. Moody, S. Gopal, and A. H. Strahler, 58:329

Classification of ASAS Multiangle and Multispectral Measurements Using Artificial Neural Networks, A. A. Abuelgasim, S. Gopal, J. R. Irons, and A. H. Strahler, 57:79

Classification of Remote Sensing Images Having High Spectral Resolution, J. P. Hoffbeck and D. A. Landgrebe, 57:119

Feature Selection for Classification of Polar Regions Using a Fuzzy Expert System, M. A. Penaloza and R. M. Welch, 58:81

An Object-Specific Image-Texture Analysis of H-Resolution Forest Imagery, G. J. Hay, K. O. Niemann, and G. F. McLean, 55:108

Retrieving Leaf Area of Boreal Conifer Forests Using Landsat TM Images, J. M. Chen and J. Cihlar, 55:153

Imaging Spectrometry

An Analysis of Chlorophyll Fluorescence Algorithms for the Moderate Resolution Imaging Spectrometer (MODIS), R. M. Letelier and M. R. Abbott, 58:215

Remote Sensing of Foliar Chemistry of Inundated Rice with Imaging Spectrometry, V. C. LaCapra, J. M. Melack, M. Gastil, and D. Valeriano, 55:50

Information Extraction

Application of Standardized Principal Component Analysis to Land-Cover Characterization Using Multitemporal AVHRR Data, Y. Hirosawa, S. E. Marsh, and D. H. Kliman, 58:267

Artificial Neural Network Response to Mixed Pixels in Coarse-Resolution Satellite Data, A. Moody, S. Gopal, and A. H. Strahler, 58:329

Assessment of Biophysical Vegetation Properties through Spectral Decomposition Techniques, S. J. Hurcom, A. R. Harrison, and M. Taberner, 56:203

An Assessment of Several Linear Change Detection Techniques for Mapping Forest Mortality Using Multitemporal Landsat TM Data, J. B. Collins and C. E. Woodcock, 56:66

Classification of ASAS Multiangle and Multispectral Measurements Using Artificial Neural Networks, A. A. Abuelgasim, S. Gopal, J. R. Irons, and A. H. Strahler, 57:79

Classification of Remote Sensing Images Having High Spectral Resolution, J. P. Hoffbeck and D. A. Landgrebe, 57:119

Classifier Performance and Map Accuracy, J. A. Richards, 57:161

Classifying the Geometry of Canopies from Time Variations of Red and Near-Infrared Reflectance, P. Malet, 56:164

Critique of Stepwise Multiple Linear Regression for the Extraction of Leaf Biochemistry Information from Leaf Reflectance Data, Y. L. Grossman, S. L. Ustin, S. Jacquemoud, E. W. Sanderson, G. Schmuck, and J. Verdebout, 56:182

Extracting Forest Age in a Pacific Northwest Forest from Thematic Mapper and Topographic Data, D. S. Kimes, B. N. Holben, J. E. Nickeson, W. A. McKee, 56:133

Feature Selection for Classification of Polar Regions Using a Fuzzy Expert System, M. A. Penaloza and R. M. Welch, 58:81

Land Cover Classification with AVHRR Multichannel Composites in Northern Environments, J. Cihlar, H. Ly, and Q. Xiao, 58:36

A Method for Manual Endmember Selection and Spectral Unmixing, A. Bateson and B. Curtiss, 55:219

A New Approach for Remote Sensing of Canopy-Absorbed Photosynthetically Active Radiation. I: Total Surface Absorption, Z. Li and L. Moreau, 55:175

A New Approach for Remote Sensing of Canopy-Absorbed Photosynthetically Active Radiation. II: Proportion of Canopy Absorption, L. Moreau and Z. Li, 55:192

An Object-Specific Image-Texture Analysis of H-Resolution Forest Imagery, G. J. Hay, K. O. Niemann, and G. F. McLean, 55:108

Potential and Limitations of Information Extraction on the Terrestrial Biosphere from Satellite Remote Sensing, M. M. Verstraete, B. Pinty, and R. B. Myneni, 58:201

Retrieving Leaf Area of Boreal Conifer Forests Using Landsat TM Images, J. M. Chen and J. Cihlar, 55:153
Use of Auxiliary Data to Improve the Precision of Estimators of Thematic Map Accuracy. S. Stehman, 58: 169

Land Classification

Classification of ASAS Multiangle and Multispectral Measurements Using Artificial Neural Networks, A. A. Abuelgasim, S. Gopal, J. R. Irons, and A. H. Strahler, 57:79
Classification of Remote Sensing Images Having High Spectral Resolution, J. P. Hoffbeck and D. A. Landgrebe, 57:119
Classifier Performance and Map Accuracy, J. A. Richards, 57:161
Effective Thermal Parameters for a Heterogeneous Land Surface, A. L. Colton, 57:143
Feature Selection for Classification of Polar Regions Using a Fuzzy Expert System, M. A. Penaloza and R. M. Welch, 58:81
Land Cover Classification with AVHRR Multichannel Composites in Northern Environments, J. Cihlar, H. Ly, and Q. Xiao, 58:36
Mapping Land Surface Emissivity from NDVI:Application to European, African, and South American Areas, E. Valor and V. Caselles, 57:167
An Object-Specific Image-Texture Analysis of H-Resolution Forest Imagery, G. J. Hay, K. O. Niemann, and G. F. McLean, 55:108
The Status of Agricultural Lands in Egypt: the Use of Multitemporal NDVI Features Derived from Landsat TM, M. Pax Lenney, C. E. Woodcock, J. B. Collins., and H. Hamdi, 56:8

Landsat TM

An Assessment of Several Linear Change Detection Techniques for Mapping Forest Mortality Using Multitemporal Landsat TM Data, J. B. Collins and C. E. Woodcock, 56:66
Extracting Forest Age in a Pacific Northwest Forest from Thematic Mapper and Topographic Data, D. S. Kimes, B. N. Holben, J. E. Nickeson, W. A. McKee, 56:133
Identifying Terrestrial Carbon Sinks: Classification of Successional Stages in Regenerating Tropical Forest from Landsat TM Data, G. M. Foody, G. Palubinskas, R. M. Lucas, P. J. Curran., and M. Honzak, 55:205
Retrieving Leaf Area of Boreal Conifer Forests Using Landsat TM Images, J. M. Chen and J. Cihlar, 55:153
The Status of Agricultural Lands in Egypt: the Use of Multitemporal NDVI Features Derived from Landsat TM, M. Pax Lenney, C. E. Woodcock, J. B. Collins., and H. Hamdi, 56:8
Thematic Mapper Characterization of Lodgepole Pine Seral Stages in Yellowstone National Park, USA, M. E. Jakubauskas, 56:118

Land Surface

Leaf Biochemistry

Critique of Stepwise Multiple Linear Regression for the Extraction of Leaf Biochemistry Information from Leaf Reflectance Data, Y. L. Grossman, S. L. Ustin, S. Jacquemoud, E. W. Sanderson, G. Schmuck, and J. Verdebout, 56:182
Estimating Leaf Biochemistry Using the PROSPECT Leaf Optical Properties Model, S. Jacquemoud, S. L. Ustin, J. Verdebout, G. Schmuck, G. Andreoli, and B. Hosgood, 56:194
Leaf Optical Properties with Explicit Description of Its Biochemical Composition: Direct and Inverse Problems, T. Fourty, F. Baret, S. Jacquemoud, G. Schmuck, and J. Verdebout, 56:104
Remote Sensing of Foliar Chemistry of Inundated Rice with Imaging Spectrometry, V. C. LaCapra, J. M. Melack, M. Gastil, and D. Valeriano, 55:50

Lidar

Estimation of Tree Heights and Stand Volume Using an Airborne Lidar System, M. Nilsson, 56:1

Mixture Models

Artificial Neural Network Response to Mixed Pixels in Coarse-Resolution Satellite Data, A. Moody, S. Gopal, and A. H. Strahler, 58:329
Assessment of Biophysical Vegetation Properties through Spectral Decomposition Techniques, S. J. Hurcom, A. R. Harrison, and M. Taberner, 56:203
Combined Use of Optical and Microwave Remote Sensing Data for Crop Growth Monitoring, J. G. P. W. Clevers and H. J. C. van Leeuwen, 56:42
A Method for Manual Endmember Selection and Spectral Unmixing, A. Bateson and B. Curtiss, 55:219

Multitemporal

An Assessment of Several Linear Change Detection Techniques for Mapping Forest Mortality Using Multitemporal Landsat TM Data, J. B. Collins and C. E. Woodcock, 56:66

The Status of Agricultural Lands in Egypt: the Use of Multitemporal NDVI Features Derived from Landsat TM, M. Pax Lenney, C. E. Woodcock, J. B. Collins., and H. Hamdi, 56:8

Oceans

Mesoscale Circulation Features of the Great Barrier Reef Region Inferred from NOAA Satellite Imagery, D. M. Burrage, C. R. Steinberg, W. J. Skirving., and J. A. Kleypas, 56:21

Potential of Simultaneous Dual-Frequency Radar Altimeter Measurements from TOPEX/Poseidon for Rainfall Estimation over Oceans, S. M. Bhandari, and S. K. Varma, 58:13

Passive Microwave

Photosynthesis

Characterization of the Photosynthetic System by Measuring the Laser-Induced Chlorophyll Fluorescence in the msec Range from Medium Distances, B. Ruth, 56: 79

Detection of Solar-Excited Chlorophyll α Fluorescence and Leaf Photosynthetic Capacity Using a Fraunhofer Line Radiometer, G. A. Carter, J. H. Jones, R. J. Mitchell, and C. H. Brewer, 55:89

Estimating Net Ecosystem Exchange of Carbon Using the Normalized Vegetation Index and an Ecosystem Model, F. Veroustraete, J. Patyn, and R. B. Myneni, 58:115

Growth, Radiation Use Efficiency, and Canopy Reflectance of Wheat and Corn Grown under Elevated Ozone and Carbon Dioxide Atmospheres, B. F. T. Rudorff, C. L. Mulchi, S. T. Daughtry, E. H. Lee, 55: 163

A New Approach for Remote Sensing of Canopy-Absorbed Photosynthetically Active Radiation. I: Total Surface Absorption, Z. Li and L. Moreau, 55:175

A New Approach for Remote Sensing of Canopy-Absorbed Photosynthetically Active Radiation. II: Proportion of Canopy Absorption, L. Moreau and Z. Li, 55:192

Polarization

Angular Signatures of Surface Reflectances from Airborne POLDER Data, M. Leroy and F.-M. Bréon, 57: 97

Radar

Characterization of Saline Soils Using Airborne Radar Imagery, G. R. Taylor., A. H. Mah, F. A. Kruse, K. S. Kierein-Young, R. D. Hewson, and B. A. Bennett, 57: 127

Combined Use of Optical and Microwave Remote Sensing Data for Crop Growth Monitoring, J. G. P. W. Clevers and H. J. C. van Leeuwen, 56:42

Potential of Simultaneous Dual-Frequency Radar Altimeter Measurements from TOPEX/Poseidon for Rainfall Estimation over Oceans, S. M. Bhandari, and S. K. Varma, 58:13

Radar Backscatter Characteristics of a Desert Surface, J. Ridley, F. Strawbridge, R. Card, and H. Phillips, 57: 63

Slicks, Waves, and Fronts Observed in a Sea Coastal Area by an X-Band Airborne Synthetic Aperture Radar, P. Forget and P. Broche, P., 57:1

Taking into Account Vegetation Effects to Estimate Soil Moisture from C-Band Radar Measurements, O. Taconet, D. Vidal-Madjar, C. Emblanch, and M. Normand, 56:52

Radiation Modeling

Effects of Shadowing Types on Ground-Measured Visible and Near-Infrared Shadow Reflectances, B. Leblon, L. Gallant, and H. Granberg, 58:322

Estimating Leaf Biochemistry Using the PROSPECT Leaf Optical Properties Model, S. Jacquemoud, S. L. Ustin, J. Verdebout, G. Schmuck, G. Andreoli, and B. Hosgood, 56:194

Estimating Net Ecosystem Exchange of Carbon Using the Normalized Vegetation Index and an Ecosystem Model, F. Veroustraete, J. Patyn, and R. B. Myneni, 58:115

An Intercomparison Study on Models of Sensible Heat Flux over Partial Canopy Surfaces with Remotely Sensed Surface Temperature, X. Zhan, W. P. Kustas, and K. S. Humes, 58:242

Inversion of a Vegetation Reflectance Model with NOAA AVHRR Data, J. L. Privette, W. J. Emery, and S. S. Schimel, 58:187

Modeling Radiative Transfer in Heterogeneous 3-D Vegetation Canopies, J. P. Gastellu-Etchegarry, V. Demarez, V. Pinel, and F. Zagolski, 58:131

A Modified Hapke Model for Soil Bidirectional Reflectance, S. Liang and R. G. Townshend, 55:1

Potential and Limitations of Information Extraction on the Terrestrial Biosphere from Satellite Remote Sensing, M. M. Verstraete, B. Pinty, and R. B. Myneni, 58: 201

A Simple Anisotropic Reflectance Model for Homogeneous Multilayer Canopies, J. P. Gastellu-Etchegarry, F. Zagolski, and J. Romier, 57:22

Rainfall Estimation

Potential of Simultaneous Dual-Frequency Radar Altimeter Measurements from TOPEX/Poseidon for Rainfall Estimation over Oceans, S. M. Bhandari, and S. K. Varma, 58:13

Reflectance Measurements

Analyses of Spectral-Biophysical Relationships for a Corn Canopy, M. Amparo Gilabert, S. Gandía, J. Melía., 55:11

Angular Signatures of Surface Reflectances from Airborne POLDER Data, M. Leroy and F.-M. Bréon, 57: 97

The Cause of the Hot Spot in Vegetation Canopies and Soils: Shadow Hiding Versus Coherent Backscatter, B. Hapke, D. DiMucci, R. Nelson, and W. Smythe, 58: 63

Critique of Stepwise Multiple Linear Regression for the Extraction of Leaf Biochemistry Information from Leaf Reflectance Data, Y. L. Grossman, S. L. Ustin, S. Jacquemoud, E. W. Sanderson, G. Schmuck, and J. Verdebout, 56:182

Detection of Solar-Excited Chlorophyll α Fluorescence and Leaf Photosynthetic Capacity Using a Fraunhofer Line Radiometer, G. A. Carter, J. H. Jones, R. J. Mitchell, and C. H. Brewer, 55:89

The Effect of Microphytes on the Spectral Reflectance of Vegetation in Semiarid Regions, A. Karnieli, M. Shachak, H. Tsoar, E. Zaady, Y. Kaufman, A. Danin, and W. Porter, 57:88

The Effect of Solar Zenith Angle and Surface Wind Speed on Water Surface Reflectivity, K. Masuda and T. Takashima, 57:58

Effects of Shadowing Types on Ground-Measured Visible and Near-Infrared Shadow Reflectances, B. Leblon, L. Gallant, and H. Granberg, 58:322

High Spectral Resolution Reflectance of Douglas Fir Grown under Different Fertilization Treatments: Experiment Design and Treatment Effects, J. Dungan, L. Johnson, C. Billow, P. Matson, J. Mazzurco, J. Moen, and V. Vanderbilt, 55:217

On the Limited Validity of Reciprocity in Measured BRDFs, K.-T. Kriebel, 58:52

Optical Properties of the Water in a Deltaic Environment: Prospective Tool to Analyze Satellite Data in Turbid Waters, Ferrari, G. M., Hoepffner, N., Mingazzini, M., 58:69

Spectral Properties of Iron-Deficient Corn and Sunflower Leaves, M. Mariotti, L. Ercoli, and Masoni, A., 58:282

Sensor Calibration

The Calibration of a Small, Low-Cost Thermal Infrared Radiometer, C. B. Rapier and K. J. Michael, 56:97

Calibration of the AVHRR Shortwave Channels: II. Application to NOAA 11 during Early 1991, R. M. Mitchell, D. M. O'Brien, B. W. Forgan, 55:139

Preflight Calibration Anomaly in the NOAA 14 AVHRR Channels 1 and 2, R. M. Mitchell, 56:141

Selection and Characterization of Saharan and Arabian Desert Sites for the Calibration of Optical Satellite Sensors, H. Cosnefroy, M. Leroy, and X. Briottet, 58: 101

Snow

Soil Properties

The Cause of the Hot Spot in Vegetation Canopies and Soils: Shadow Hiding Versus Coherent Backscatter, B. Hapke, D. DiMucci, R. Nelson, and W. Smythe, 58: 63

Characterization of Saline Soils Using Airborne Radar Imagery, G. R. Taylor., A. H. Mah, F. A. Kruse, K. S. Kierein-Young, R. D. Hewson, and B. A. Bennett, 57: 127

A Modified Hapke Model for Soil Bidirectional Reflectance, S. Liang and R. G. Townshend, 55:1

Multivariate Statistical Classification of Soil Spectra, A. Palacios-Orueta and S. L. Ustin, 57:108

Optimization of Soil-Adjusted Vegetation Indices, G. Rondeaux, M. Steven, and F. Baret, 55:95

Taking into Account Vegetation Effects to Estimate Soil Moisture from C-Band Radar Measurements, O. Taconet, D. Vidal-Madjar, C. Emblanch, and M. Normand, 56:52

Spectroradiometry

Angular Signatures of Surface Reflectances from Airborne POLDER Data, M. Leroy and F.-M. Bréon, 57: 97

The Effect of Solar Zenith Angle and Surface Wind Speed on Water Surface Reflectivity, K. Masuda and T. Takashima, 57:58

The Micro Fourier Transform Interferometer (μFTIR)—A New Field Spectrometer for Acquisition of Infrared Data of Natural Surfaces, S. J. Hook and A. B. Kahle, 56:172

Multivariate Statistical Classification of Soil Spectra, A. Palacios-Orueta and S. L. Ustin, 57:108

On the Limited Validity of Reciprocity in Measured BRDFs, K.-T. Kriebel, 58:52

SPOT

Surface Radiation

Surface Temperature

Characterization of Saline Soils Using Airborne Radar Imagery, G. R. Taylor., A. H. Mah, F. A. Kruse, K. S. Kierein-Young, R. D. Hewson, and B. A. Bennett, 57:127

Cloud Detection from a Sequence of SST Images, J.-F. Cayula and P. Cornillon, 55:80

Effective Thermal Parameters for a Heterogeneous Land Surface, A. L. Colton, 57:143

Examination of the Difference of between Radiative and Aerodynamic Surface Temperatures over Sparsely Vegetated Surfaces, A. Chehbouni, D. Lo Seen, E. G. Njoku, and B. M. Monteny, 58:177

An Intercomparison Study on Models of Sensible Heat Flux over Partial Canopy Surfaces with Remotely Sensed Surface Temperature, X. Zhan, W. P. Kustas, and K. S. Humes, 58:242

Satellite Derived Sea Surface Temperature Variability in the Western Tropical Pacific Ocean, 1992–1993, Y. Yu and W. J. Emery, 58:299

Thematic Mapping

Anomalies on Geologic Maps from Multispectral and Textural Classification: The Bleida Mining District (Morocco), A. Emran, M. Hakdaoui, and J. Chorowicz, 57:13

An Assessment of Several Linear Change Detection Techniques for Mapping Forest Mortality Using Multitemporal Landsat TM Data, J. B. Collins and C. E. Woodcock, 56:66

Classifier Performance and Map Accuracy, J. A. Richards, 57:161

Extracting Forest Age in a Pacific Northwest Forest from Thematic Mapper and Topographic Data, D. S. Kimes, B. N. Holben, J. E. Nickeson, W. A. McKee, 56:133

Preflight Calibration Anomaly in the NOAA 14 AVHRR Channels 1 and 2, R. M. Mitchell, 56:141

Use of Auxiliary Data to Improve the Precision of Estimators of Thematic Map Accuracy. S. Stehman, 58:169

Thermal Measurements

The Calibration of a Small, Low-Cost Thermal Infrared Radiometer, C. B. Rapier and K. J. Michael, 56:97

The Micro Fourier Transform Interferometer (μFTIR)—A New Field Spectrometer for Acquisition of Infrared Data of Natural Surfaces, S. J. Hook and A. B. Kahle, 56:172

Topography

Vegetation Indices

Calibrating Long-Term AVHRR-Derived NDVI Imagery, M. Roderick, R. Smith, and G. Lodwick, 58:1

Effects of Standing Litter on the Biophysical Interpretation of Plant Canopies, W. J. D. van Leeuwen and A. R. Huete, 55:123

Estimating Net Ecosystem Exchange of Carbon Using the Normalized Vegetation Index and an Ecosystem Model, F. Veroustraete, J. Patyn, and R. B. Myneni, 58:115

Mapping Land Surface Emissivity from NDVI:Application to European, African, and South American Areas, E. Valor and V. Caselles, 57:167

NDWI—A Normalized Difference Water Index for Remote Sensing of Vegetation Liquid Water from Space, B.-C. Gao, 58:257

Optimization of Soil-Adjusted Vegetation Indices, G. Rondeaux, M. Steven, and F. Baret, 55:95

The Precision of the NDVI Derived from AVHRR Observations, M. Roderick, R. Smith, and S. Cridland, 56:57

Vegetation Properties

Analyses of Spectral-Biophysical Relationships for a Corn Canopy, M. Amparo Gilabert, S. Gandía, J. Melía., 55:11

Assessment of Biophysical Vegetation Properties through Spectral Decomposition Techniques, S. J. Hurcom, A. R. Harrison, and M. Taberner, 56:203

The Cause of the Hot Spot in Vegetation Canopies and Soils: Shadow Hiding Versus Coherent Backscatter, B. Hapke, D. DiMucci, R. Nelson, and W. Smythe, 58:63

Classifying the Geometry of Canopies from Time Variations of Red and Near-Infrared Reflectance, P. Malet, 56:164

Critique of Stepwise Multiple Linear Regression for the Extraction of Leaf Biochemistry Information from Leaf Reflectance Data, Y. L. Grossman, S. L. Ustin, S. Jacquemoud, E. W. Sanderson, G. Schmuck, and J. Verdebout, 56:182

Effects of Standing Litter on the Biophysical Interpretation of Plant Canopies, W. J. D. van Leeuwen and A. R. Huete, 55:123

Growth, Radiation Use Efficiency, and Canopy Reflectance of Wheat and Corn Grown under Elevated

Ozone and Carbon Dioxide Atmospheres, B. F. T. Rudorff, C. L. Mulchi, S. T. Daughtry, E. H. Lee, 55: 163

High Spectral Resolution Reflectance of Douglas Fir Grown under Different Fertilization Treatments: Experiment Design and Treatment Effects, J. Dungan, L. Johnson, C. Billow, P. Matson, J. Mazzurco, J. Moen, and V. Vanderbilt, 55:217

Leaf Optical Properties with Explicit Description of Its Biochemical Composition: Direct and Inverse Problems, T. Fourty, F. Baret, S. Jacquemoud, G. Schmuck, and J. Verdebout, 56:104

NDWI--A Normalized Difference Water Index for Remote Sensing of Vegetation Liquid Water from Space, B.-C. Gao, 58:257

Spectral Properties of Iron-Deficient Corn and Sunflower Leaves, M. Mariotti, L. Ercoli, and Masoni, A., 58:282

Videography

Water

The Effect of Solar Zenith Angle and Surface Wind Speed on Water Surface Reflectivity, K. Masuda and T. Takashima, 57:58

Optical Properties of the Water in a Deltaic Environment: Prospective Tool to Analyze Satellite Data in Turbid Waters, Ferrari, G. M., Hoepffner, N., Mingazzini, M., 58:69

Satellite Assessment of Mississippi River Plume Variability: Causes and Predictability, N. D. Walker, 58:21

Slicks, Waves, and Fronts Observed in a Sea Coastal Area by an X-Band Airborne Synthetic Aperture Radar, P. Forget and P. Broche, P., 57:1
